Dear sir or madam:

This application comes in response to your advertisement in to hire Electrical Engineer. I believe I am excellent candidate for the available position(s) you have. Based on my studies and past experiences, I can work with in supervising electric machines, control systems, electronics, power installation and electronic drives. I have got my BSc degree from **ADDIS ABABA SCIENCE AND TECHNOLOGY UNIVERSITY** on June 28, 2016 by **Electrical and Computing Engineering** in stream of **power**.

I am experienced in power transmission, distribution, generation and control. Since my internship when I was in university. I have the experience of maintaining different electrical devices, electrical motors (Rewinding), computer maintenance (software and hardware) and control panels through my two years working experience and internship time. I was in **Ethiopian Electric utility (TanaBeles)** internee from March 2015 to July 2015 and in Lideta Manufacture College working for five years. I am skilled of designing industrial and building electrical installation. I am innovate electrical car working with solar energy and wind turbine. I have done great project on Design and Implementation of Multi-level Inverter.

My CV lists these experiences and other trainings in which I am certified. I am highly devoted and problem solver with excellent written and oral communication skills. I enjoy working as part of a time. I want to learn, increase exposure to new technologies, and eventually (though not right away) continue with my education.

Please contact me if you have any question or for an interview at your earliest convenience.

Regards:

Birhanu W/Mariam
